

## Children + Drugs = Risk

National DEC defines drug endangered children as children who are at risk of suffering physical or emotional harm as a result of illegal drug use, possession, manufacturing, cultivation, or distribution. They may also be children whose caretaker's substance misuse interferes with the caretaker's ability to parent and provide a safe nurturing environment.

Our mission is to recognize Drug Endangered Families and break the cycle of abuse and neglect by strengthening community capacity and coordinating efforts.

Carbon County  
DEC exists to  
help make a  
difference in the  
lives of children  
who are living in  
dangerous drug  
environments.

The primary challenge  
with drug endangered  
children is identifying  
children at risk and  
coordinating the various  
systems and disciplines  
charged with intervening,  
and providing services to  
these children and  
families.
